Tropical Plant Responses to Climate Change

Message from the Guest Editors

Climate changes (CCs) are expected to have a wide range of impacts on plant physiology and metabolism, soil fertility and carbon sequestration, and microbial diversity and activity. This imposes direct limitations on plant growth, fertility, and productivity. Tropical regions harbor most of the world's biodiversity-rich areas and at the same time are particularly vulnerable to CCs. To promote the sustainability of tropical ecosystems, efforts are necessary to enhance our knowledge of molecules governing key processes that might play a role in the mechanisms of stress resilience in plants. This Special Issue aims at publishing a collection of studies that use integrated molecular tools to unveil tropical plant responses to environmental stresses associated with CCs. Authors are invited to submit related original research articles, reviews, and communications. Note: Papers submitted within two months later after the deadline (before 31 May) are also welcomed.

Guest Editors

Dr. Isabel Marques

Prof. Dr. Ana I Ribeiro-Barros

Dr. José C. Ramalho

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
