# Current and Future Roles of Tumor Markers in Prostate Adenocarcinoma

### Message from the Guest Editor

Prostate cancer is the most common non-skin cancer and the second cancer-related cause of death in men, with 1,414,259 new cases and 375,304 deaths reported in 2020. It represents an enormous burden on the healthcare system and the economy, and currently presents several formidable challenges:

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
