Molecular Research of Cancer Metabolism and Biomarkers

Message from the Guest Editor

It is well established that metabolic reprogramming is a major feature of neoplastic transformation and progression. Metabolic reprogramming involves complex pathway remodeling and multifaceted interactions between cancer cells and the TME, thereby influencing resistance to chemotherapy and biologicals, including immunotherapy. Despite this growing body of knowledge, the extent to which metabolic remodeling confers protumorigenic features in clinically relevant settings still needs to be elucidated and is critical for the development of metabolic modulators that can attenuate cancer progression *in vivo*. On the other hand, gaining knowledge about these processes goes hand in hand with the identification of prognostic and diagnostic biomarkers. These efforts clearly necessitate multidisciplinary approaches and a multifaceted omics approach. We invite all colleagues to contribute to this interesting discussion.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
