Special Issue

Lipid Membranes as Multifunctional Platforms for Bioactive Delivery

Message from the Guest Editor

Lipid membranes are versatile, biomimetic structures that have attracted significant attention as delivery platforms for a wide range of bioactive compounds. Their unique ability to encapsulate, protect and release molecules with controlled kinetics makes them ideal for applications where stability, biocompatibility and targeted performance are crucial. Recent advances in lipid-based systems, including liposomes, micelles, and nanostructured lipid carriers, are opening up new opportunities to enhance the delivery and efficacy of bioactive substances in various sectors, such as healthcare, nutrition and cosmetics. The aim of this Special Issue is to highlight the latest progress in the design, characterisation and application of lipid membranes as smart carriers. We welcome contributions addressing fundamental aspects of membrane structure and dynamics, novel strategies to improve stability and bioavailability, computational and in silico studies, and innovative methods to tailor release profiles.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
