CNS Drug Action in Neurodegenerative Diseases

Message from the Guest Editor

Amyotrophic lateral sclerosis, multiple sclerosis, Alzheimer's, and Parkinson's disease are neurodegenerative diseases of the central nervous system. Intensive research is ongoing to eventually unravel the mechanisms underlying neurodegeneration and central nervous system repair. This open-access Special Issue will bring together original research and review articles on the mode of action of different drugs, highlighting what has already been achieved and which new discoveries, approaches, and technical developments in central nervous system research are on their way.

Topics of this Special Issue include but are not limited to:

- Etiology and pathogenesis of neurodegenerative diseases;
- Mechanisms of neurodegeneration, neuroprotection, and neural repair in the central nervous system;
- Pharmaceutical and pharmacological central nervous system drug classification;
- Mode of action of central nervous system drugs;
- Past and ongoing clinical trials using CNS drugs in neurodegenerative diseases;
- Novel strategies for the prevention and treatment of CNS degeneration.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
