

## Special Issue

# Molecular Biomarkers in Cancer and Chronic Inflammation: New Therapeutic Approaches

### Message from the Guest Editors

Cancer cells, as well as peritumoral and inflammatory ones, engage in well-orchestrated interplays to form an inflammatory tumor-driven microenvironment, often associated with drug resistance during treatment. The crosstalk between inflammatory biomarkers and the intrinsic properties of tumor cells have been identified as a pivotal regulator of tumor initiation and progression. This Special Issue will include some of the current and interesting advances on molecular and biochemical markers/targets in different tissues and will include gene expression, protein, and biochemical pathways, such as key regulators in inflammation and cancer signaling.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
