Cardiovascular Risk in Diabetes Mellitus: Mechanisms, Drugs, and Other Therapies

Message from the Guest Editors

Patients with both T1DM and T2DM have a decreased life expectancy, mainly due to an increased incidence of cardiovascular (CV) diseases compared with people without these conditions. Thus, diabetes might have an intrinsic, residual CV risk that is not fully addressed by available therapies. In this special issue, we seek for contributions exploring the effect of old and novel molecular mechanisms to the development of diabetes complications, particularly the CV ones. Clinical studies assessing the relevance of non-canonical risk factors to the development of CV diseases in patients with diabetes are also welcomed, as long as they explore also an associated molecular mechanism. Finally, studies exploring the underpinnings of the effect of glucose-lowering drugs (old or novel) are also of great interest. Manuscripts dealing with T2DM are a priority while papers on T1DM are also encouraged, as long as they deal with the development of CV complications. Original research papers, short-communications, and reviews, both narrative and systematic, are all eligible pieces for this special issue.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
