

## Special Issue

# Molecular Research in Cardiovascular Disease 2.0

### Message from the Guest Editors

Cardiovascular diseases (CVD) are the leading cause of death worldwide. Atherosclerosis, the dominant driver of CVD, is characterized by a process of chronic inflammation and endothelial dysfunction associated with vessel wall accumulation of oxidized low-density lipoproteins. The molecular and cellular mechanisms underlying various cardiovascular diseases are not completely understood. However, several signaling pathways that induce vascular remodeling are essential in both coronary heart disease and in related pathologies, such as pulmonary artery hypertension, suggesting the existence of common mechanisms in these maladies. With this Special Issue, we aim to present representative data obtained at the interface between basic science and clinical research on the molecular mechanisms of heart and vascular diseases and the novel biomarkers and molecules that can become specific targets for future therapeutic interventions. In addition, we hope that the papers presented will inspire novel innovative investigations at the bench to bedside intersection.

### Guest Editors

Prof. Dr. Maria I. Dorobantu

1. Corresponding member of the Romanian Academy, 125, Calea Victoriei, Sector 1, RO - 010071 Bucharest, Romania
2. Department 4-Cardiothoracic Pathology, University of Medicine and Pharmacy Carol Davila, 8, Eroii Sanitari Bvd., 050474 Bucharest, Romania

Prof. Dr. Maya Simionescu

Romanian Academy-President of the Section of Biological Sciences, Institute of Cellular Biology and Pathology "N. Simionescu", Bucharest, Romania

### Deadline for manuscript submissions

closed (30 November 2022)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
