Novel Molecular Targets in Cardiovascular Diseases

Message from the Guest Editors

The Special Issue “Novel Molecular Targets in Cardiovascular Diseases” will cover a selection of the most recent scientific studies and current review articles in the field of clinical, translational, and basic research dedicated to the discovery of biomarkers, molecular, and/or cellular mechanisms to be exploited as therapeutic targets or diagnostic tools to improve the outcome of patients with cardiovascular disease. Experimental papers, up-to-date review articles, and commentaries are all welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
