Inflammatory Disturbances in Cerebrovascular and Cardiovascular Diseases

Message from the Guest Editors

Cardiovascular disease (CVD) is the leading cause of death globally, taking an estimated 17 million lives each year. Approximately 80% of CVD deaths are due to heart attacks and stroke. Inflammation constitutes a hallmark of CVD development and contributes to atherosclerosis, myocardial infarction, heart failure, and hypertension. A rich body of literature demonstrates that acute or chronic inflammation is associated with the increased risk of CVD and may be an important determinant of outcomes. Indeed, post-stroke inflammation and immunodepression may increase the risk of infections such as pneumonia and negatively impact the disease outcome. Immunomodulatory approaches to managing multiple CVDs are gaining interest. The main objective of this Special Issue is to enhance our basic understanding by identifying novel targets and mechanisms of inflammatory disturbances in CVD. Potential study topics include, but are not limited to, immune target identification, models of immune cell deletion, immunomodulatory therapy, and the spatiotemporal distribution of immune cells and cytokines/chemokine in the context of CVDs.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
