Role of the Circadian Rhythm in Cancer Pathogenesis and Treatment

Message from the Guest Editor

The circadian clock driven by the daily light–dark and temperature cycles of the environment regulates fundamental physiological processes and perturbations of these sophisticated mechanisms may result in pathological conditions, including tumor development. A circadian regulation has been proposed for key aspects of cancer cell biology, including cell cycle, genotoxic stress response and metabolism. Here, we propose to collect studies focusing on how the circadian clock interfaces with many oncogenes and tumor suppressors. We particularly welcome manuscripts on the following subjects: Regulation of oncogenes and tumor suppressors by the circadian clock; Tissue-specific circadian control of tumorigenesis; Role of clock genes as putative oncogenes/tumor suppressor genes; Deregulation of circadian rhythms by oncogenes or tumor suppressors.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
