Carbon Nanotube-Based Materials: Experiments and Modelling

Message from the Guest Editor

With their vastly superior mechanical, electrical, and thermal properties, carbon nanotubes (CNTs) can be expected to seed significant developments leading to a new generation of future advanced materials. High-performance CNTs have increasingly been used in numerous applications, such as in the manufacture of multifunctional composites, engineering fibers, and electronic and electrochemical devices. Over the last decade, efforts have been carried out to improve the mechanical, electrical, and thermal performances of CNT products by controlling the length, wall number, diameter, alignment, inter-tube load transfer, and entanglement of the constituent CNTs. This Special Issue focuses on current innovative research of carbon nanotube-based materials through experiments and computational modeling.

Guest Editor

Dr. Hai Minh Duong

Department of Mechanical Engineering, National University of Singapore, Singapore

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
