Special Issue

Evolving Perspectives in Colon Cancer Treatment and Research

Message from the Guest Editor

Precision medicine is increasingly developing therapy algorithms through the identification and characterization of markers according to their involvement in distinct cancer pathways. Regarding the early stage of the disease, one major question concerns the risk of recurrence and minimal residual disease: when is staging based on pathologic features adequate for shared therapeutic evaluation? Could circulating tumor DNA (ctDNA) prove useful in relapse-risk stratification? These are the main issues concerning future developments. This Special Issue aims to provide an overview of the main achievements in the field of colon cancer treatment, providing prospective lines of research. We also would like to provide comprehensive overviews over important aspects of the molecular events in the Colon cancer life cycle, disease development and the current state of Colon cancer treatment.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
