

## Special Issue

# Computational Modeling of Ionic Liquids and Solutions for Modern Applications

### Message from the Guest Editor

Computational simulations have become an extremely useful tool and complementary partner to experimental techniques for the investigation of myriad systems. The papers in this special issue are focused on the development of methods and application of computational techniques for the investigation of room temperature ionic liquids and related solutions for modern applications including solvation, catalysis, electrochemistry, etc. The purpose of this collection is to highlight the broad applicability of state-of-the-art computational modeling to address open questions in these types of systems.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
