

Special Issue

Advances in the Genetic Research on Psychiatric Disorders

Message from the Guest Editor

Authors are invited to submit original research articles, reviews, and case studies that explore various aspects of genetic research in psychiatric disorders. Topics of interest include, but are not limited to, gene-environment interactions, epigenetic modifications, genome-wide association studies (GWASs), next-generation sequencing, and the identification of novel genetic variants. Additionally, studies that investigate the translation of genetic findings into clinical practice, personalized medicine, and therapeutic interventions are highly encouraged. This Special Issue aims to foster a deeper understanding of the genetic architecture of psychiatric disorders and to inspire future research endeavors. By disseminating the latest advancements, we hope to contribute to the development of more effective diagnostic tools and treatments, ultimately improving the lives of individuals affected by these challenging conditions. We look forward to your valuable contributions and to advancing the frontiers of psychiatric genetic research together.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
