

Special Issue

Advances in Neurodegenerative Diseases and Inflammation: Pathogenesis, Biomarkers and Treatments

Message from the Guest Editors

Neurodegenerative diseases (ND) are a heterogeneous group of disorders characterized by the progressive dysfunction and loss of neurons in different areas of the central or peripheral nervous system.

This Special Issue aims to collect research articles and literature reviews in the field of neurodegenerative diseases research, including Dementia, Multiple Sclerosis, Amyotrophic Lateral Sclerosis and Parkinson's disease, to unravel molecular mechanisms underpinning their pathogeneses and new molecular biomarkers, with a focus on the role of inflammation.

Guest Editors

Dr. Luisa Agnello

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
