Novel Heterocyclic Bioactive Compounds: Design, Synthesis and Biological Evaluation

Message from the Guest Editor

Heterocyclic compounds are among the most important scaffolds in medicinal chemistry, providing the structural framework for numerous biologically active molecules.

This Special Issue, entitled “*Novel Heterocyclic Bioactive Compounds: Design, Synthesis and Biological Evaluation*”, focuses on recent progress in the design and synthesis of new heterocyclic compounds with potential pharmacological applications and the elucidation of their mechanisms of action. We welcome the submission of original research articles and reviews addressing synthetic methodologies, structure–activity relationship investigations, computational approaches, and molecular-level biological evaluations that emphasise the correlation between chemical structure and biological activity and provide insights into the potential mechanisms of action. This Special Issue aims to highlight innovative research into the rational design and synthesis of novel heterocyclic scaffolds, together with their comprehensive biological evaluation as potential therapeutic agents.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
