

Special Issue

Pancreatic Diseases: Molecular Pathology and Therapeutics

Message from the Guest Editor

This Special Issue delves into the intricate molecular mechanisms underlying pancreatic diseases, highlighting advances in the understanding of these pathologies and therapeutic strategies. Unravelling the complexities of the pathophysiological mechanisms of pancreatic diseases by focusing on the search for molecular markers, genetic predispositions, and cellular interactions is pertinent to this. By bridging the gap between molecular pathology and clinical applications, this issue aims to foster new diagnostic tools and treatments that improve patient outcomes. Contributions from diverse disciplines are expected to provide a comprehensive perspective on pancreatic diseases, with an emphasis on translational research that could lead to advances in the treatment of diseases such as pancreatic cancer, diabetes, and acute and chronic pancreatitis. Original research papers and review articles are welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
