Special Issue

Targeting Epilepsy: Molecular Mechanisms, Neuroinflammation and Emerging Therapies

Message from the Guest Editor

This Special Issue presents cutting-edge advancements in the understanding and treatment of epilepsy, a complex neurological disorder characterized by recurrent, unprovoked seizures. Emphasis is placed on the identification and characterization of novel molecular targets involved in epileptogenesis, including ion channels, neurotransmitter systems, and intracellular signaling pathways. The role of neuroinflammation and immune-mediated mechanisms in seizure initiation and progression is critically examined, highlighting emerging opportunities for targeted intervention. Contributions also address advances in rational drug design, high-throughput screening, and translational models that bridge preclinical models and clinical applications and accelerate antiseizure medication discovery. By integrating insights from molecular neuroscience, pharmacology, and systems biology, this collection aims to foster interdisciplinary dialog and inform future directions in epilepsy research and therapeutic innovation.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
