DNA Damage Response, an Update

Message from the Guest Editor

DNA damage response (DDR) represents the way cells react to preserve genome integrity. DNA breaks can arise either spontaneously, during replication, or in response to exogenous compounds. Biochemical characterization of signaling events underlying the DDR has allowed the design and the development of specific inhibitors. Nonetheless, their potential use in monotherapy strategies or in combination with radiotherapy or chemotherapy against cancer cells has not given the expected results. This may be due to the fact that DDR is controlled in a redundant way through intricate and complex mechanisms. These mechanisms involve either post-translational modifications on chromatin, expression of small regulatory RNAs, or changes in chromatin architecture. In this topic, we invite the submission of original research papers and review articles that cover any aspect of DDR. Special emphasis will be given to the emerging crosstalk between DDR and other cellular signaling paths, occurring either in physiological or pathological conditions.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
