

Special Issue

Prospective and Cutting-Edge Research for Diabetic Complications

Message from the Guest Editor

Recently, pathogenesis of diabetic complications has become more diverse. There is a need for comprehensive research that focuses not only on vascular complications but also on bones, muscles and dementia. Along with this, the identification of the factors and hormones that are linked to organs is becoming increasingly important. Pioneering research on this can be expected to greatly contribute to the novel diagnosis and treatment of diabetes and its complications. This Special Issue will include papers that investigate the mechanisms underlying the development and progression of diabetic complications (microangiopathy, macroangiopathy, dementia, sarcopenia, frail, bone metabolism, etc.). Experimental studies and clinical research using molecular biological and/or physiological analysis will be considered. Original articles, as well as review articles, are welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
