

Special Issue

Dual Fluorescence Effects

Message from the Guest Editors

This special issue is dedicated mainly to a subject of dual fluorescence observed in various molecules and systems such as organic solvents, aqueous media with varied pH and temperature, solid state amorphous and crystalline forms, or various mixed systems. The research on dual fluorescence in model biological systems such as liposomal, micellar, nanoparticles, and complex systems are particularly welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
