

Special Issue

Stress Response Research: Yeast as Models: 2nd Edition

Message from the Guest Editors

This Special Issue is a continuation of our previous Special Issue, titled "[Stress Response Research: Yeast as Models](#)". *Saccharomyces cerevisiae* yeast was among the first living beings to be domesticated, and it is used as a "cell factory" for the production of biological drugs such as insulin and other valuable molecules. It has also been used as a model to elucidate the molecular mechanisms underlying biological processes, such as the cell cycle, DNA replication, the regulation of gene expression, aging, and regulated cell death, which are crucial processes in cell stress response and the maintenance of cellular homeostasis. This Special Issue aims to collect emerging concepts in the field of cell stress response, using yeast as a model system. The topics of interest for this Special Issue include the following: molecular pathways of cell stress response, signal transduction and protein trafficking, aging, and regulated cell death, as well as organelle biogenesis, function, and communication.

Guest Editors

Dr. Cristina Mazzoni

Department of Biology and Biotechnology "C. Darwin", Sapienza University of Rome, Piazzale Aldo Moro 5, 00185 Rome, Italy

Dr. Sergio Giannattasio

Institute of Biomembrane, Bioenergetics and Molecular Biotechnologies, National Research Council of Italy, Via Amendola 122/O, 70126 Bari, Italy

Deadline for manuscript submissions

closed (20 August 2025)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
