

Special Issue

Bioactives from Natural Products

Message from the Guest Editor

Throughout history, plant species, microorganisms, and marine organisms have been used by diverse cultures as a source of traditional remedies for the treatment and prevention of diseases. This ancient knowledge has served as the basis for the development of modern medicine, where the systematic study of these organisms continues to reveal their enormous therapeutic potential. In this context, natural products constitute an exceptional source of bioactive compounds with increasingly relevant applications in therapeutic, preventive, and biotechnological fields. In recent decades, the growing scientific interest in these secondary metabolites has been driven by significant advances in high-resolution analytical techniques, molecular biology, and omics platforms. We hope this Special Issue will foster interdisciplinary knowledge exchange and stimulate the development of innovative solutions based on natural products. Accepted articles will contribute to a better understanding of the therapeutic potential of natural bioactive compounds and their potential use in the context of human health.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
