

Special Issue

Advanced Research in Retina: 3rd Edition

Message from the Guest Editors

The retina is one of the main structures of the eye and is fundamental in the process of seeing. It is also part of the central nervous system (CNS), as it is an extension of the brain. This Special Issue aims to provide a research platform for the collection of recent original and review articles that address the pathogenic mechanisms of diverse retinal pathologies, innovative diagnostic techniques, and the development of new therapeutic strategies. It will also include articles that investigate retinal alterations in neurodegenerative diseases (AD, PD, ALS, among others), the development of new diagnostic techniques using the retina, and the monitoring of new treatments through the retina.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
