

Special Issue

Molecular Mechanisms of Allergy and Asthma: 3rd Edition

Message from the Guest Editors

This Special Issue is a continuation of our previous successful Special Issues “[Molecular Mechanisms of Allergy and Asthma](#)” and “[Molecular Mechanisms of Allergy and Asthma 2.0](#)”. The aims of this Special Issue on “[Molecular Mechanisms of Allergy and Asthma 3.0](#)” are to: (1) perform an update (review) on the current status of our knowledge of the contribution of molecular mechanisms to the development and clinical course of asthma and other allergic disorders and (2) further increase this knowledge as well as identify (3) new diagnostic options, and assess their relevance, and (4) molecular targets for novel therapies. Submissions may include original research and different types of reviews.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
