New Challenges in Rheumatoid Arthritis

Message from the Guest Editor

Rheumatoid arthritis represents a significant challenge in the field of health. In this context, substantial progress has been made in understanding the etiopathogenesis of these diseases, with the identification of new biomarkers emerging as critical for both diagnosis and disease monitoring.

Within the key mechanisms underlying these diseases, chronic inflammation, immune dysfunction, and joint damage play central roles in pathophysiology. Therefore, it is essential to deepen our understanding of these mechanisms, as well as the cellular and molecular processes that trigger them. Genetic predisposition plays a crucial role, as certain gene variants are associated with an increased susceptibility to the disease.

In summary, this Special Issue aims to bring together the latest molecular advances in rheumatoid arthritis. It is our hope that this Issue will contribute to current knowledge and future therapeutic strategies, providing a better understanding of the etiopathogenesis of rheumatoid arthritis.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
