Special Issue

Cyclin-Dependent Kinases: Their Role in Cell Physiology and Pathologies

Message from the Guest Editors

This Special Issue of *IJMS* includes a broad range of basic and translational articles, both original research reports and reviews, focused on the latest developments in the regulation of cellular process and molecular pathways involving CDKs. This Issue focuses on the role of CDKs, but papers devoted to their regulatory subunits—cyclins and CDK inhibitors—are also welcomed.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
