# Extracellular Vesicles in Microbes, Pathogens and Infectious Diseases

### Message from the Guest Editors

This Special Issue of *IJMS* is focused on "*Extracellular Vesicles in Microbes, Pathogens and Infectious diseases*". The Issue welcomes papers covering microbial EVs characterization, quantification, purification, their cargos, and the elucidation of their biogenesis and roles during infections. Topics of interest include, but are not limited to, the following regarding EVs:

- Genomics and transcriptomics (including small RNA);
- Therapeutics and diagnostics in infectious diseases;
- Immunology;
- Vaccine candidate;
- Drug resistance;
- Drug targeting;
- Characterization and purifications;
- Virulence and pathogenesis;
- Host-pathogen interactions;
- Cross-species interactions;
- RNAi-mediated communications;
- Adaptation to the environment.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
