

## Special Issue

# Healing of Ligaments and Tendons: Tissue Engineering and Models 2.0

### Message from the Guest Editor

This Special Issue will present insights into novel approaches for tendon and ligament reconstruction based on tissue engineering or cell-free strategies using natural or synthetic biomaterials. As natural biomaterials for tendon/ligament reconstruction collagen-based scaffolds, decellularized tendons/ligaments or other dense connective tissue-derived extracellular matrices are of high interest. Valuable three-dimensional in vitro models including the application of bioreactors and versatile mechano-stimulatory devices which are known to promote in vitro teno-/ligamentogenesis should be presented for initial testing of implants, but also preclinical in vivo implantation models are welcome which allow monitoring of the complex healing process. In addition to reconstruction of the midsubstance of tendons/ligaments, the neoformation of an enthesis-like interface between tendon/ligament and bone is an important prerequisite for stable reconstruction; hence, this unique transition tissue may also be addressed.

### Guest Editor

Prof. Dr. Gundula Schulze-Tanzil

Institute of Anatomy and Cell Biology, Paracelsus Medical University, Nuremberg and Salzburg, 90419 Nuremberg, Germany

### Deadline for manuscript submissions

closed (30 September 2023)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
