

Special Issue

Molecular Studies in Endocrinology and Reproductive Biology

Message from the Guest Editors

Reproductive endocrinology describes the hormones and the control mechanisms that regulate reproduction. Disorders of reproductive endocrinology can occur due to abnormal changes anywhere in the hypothalamus–pituitary–gonadal axis. This Special Issue describes the approach to the diagnosis and evaluation of disorders of the reproductive endocrinology system, with a special emphasis on the roles of obesity, hypothyroidism and PCO in infertility. The importance of epigenetic factors and evidence-based treatments can also be addressed as well. Of interest are stimulation protocols during IVF, with a special reference to the benefits and pitfalls of these protocols. The hormonal profile of the cord blood—in IVF babies compared to regular babies—is a project to be included. Please note that papers published in the International Journal of Molecular Sciences are encouraged to include results at the molecular level. Both original research articles and reviews on these topics are welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
