

## Special Issue

# Molecular Endocrinology and Molecular Markers in Animals

### Message from the Guest Editors

This Special Issue will focus on molecular endocrinology and molecular markers involved in animal research; the gene expression regulatory mechanisms involved in the hormonal control of animal growth and reproduction; the genes involved in controlling gonadal development and changes during the reproduction cycle; interaction between gene expression in the brain, pituitary, and gonad hormone axis (BPG) in animals during growth and reproduction; molecular markers in animals for sex differentiation and sex determination; whole-genome and transcriptome studies in BPG and their application to agriculture.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
