

Special Issue

Advances and Perspectives in Epigenetics and Autoimmune Diseases

Message from the Guest Editor

This Special Issue will focus on the growing roles of epigenetics in autoimmune diseases, from the contribution of epigenetic modifications to disease onset and progression. However, and despite the repeated description of epigenetic changes during the course of autoimmune diseases, in tandem with environmental factors including drug exposure and genetic traits, we are far from fully understanding the underlying molecular mechanisms leading to the development, progression, and therapeutic response of complex diseases such as autoimmune diseases. Accordingly and for this Special Issue, we will consider original review, research, or method manuscripts related to the molecular, cellular, and clinical significance of epigenetic aberrations as well as treatments based on the modulation of epigenetic mechanisms in the clinical management of autoimmune diseases.

Guest Editor

Prof. Dr. Yves Renaudineau

Department of Immunology, Hôpital Purpan, INSERM U1291, CNRS U5051, Université Toulouse III, 31062 Toulouse, France

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
