Recent Advances in Hydrogen Bonding

Message from the Guest Editor

Due to the frequent occurrence and importance of hydrogen bonding as a factor responsible for the arrangement of molecules in crystals, solutions and the gas phase, which determines the properties of matter, hydrogen bonding is important in chemistry and physics. It is also important in biological and medical research, drug interactions, the search for new materials and structural research. For many years, the intensity of the research and its wide scope covering an increasing variety of hydrogen bonding systems not only deepens the understanding of hydrogen bonding but also identifies a number of specific systems characterized as improper hydrogen bonding. Therefore, it is necessary to redefine hydrogen bonds and distinguish them from other interactions. This Special Issue is dedicated to all studies that indicate the importance of hydrogen bonding as an interaction determining various properties of the molecular systems under study, as well as focusing on the problems of describing hydrogen bonding as such.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
