

Special Issue

Structural Characterization and Pharmacological Activity of Natural Compounds

Message from the Guest Editor

This Special Issue aims to provide an overview of significant research on the structural characterisation of natural bioactive compounds and their pharmacological activity. For this purpose, conventional and emerging methods for detailed chemical structure analysis can be used, as can various methods to evaluate natural pharmacological activities, molecular mechanisms, and the structure–activity relationship. Such research contributes to deepening the current knowledge of natural compounds and offers a reference point for further natural compound utilization.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
