Molecular Insights into Fruit Crops Development

Message from the Guest Editor

Fruit crops are agricultural products with high economic importance. Fruit development and the ripening regulation of fruit trees are two of the most important issues in plant and fruit science. People have made great efforts to study the molecular mechanisms in the development of fruit trees. With the development of scientific and technological advances such as big proteomics, genomics, and metabolomics, powerful tools have been created for the study of fruit tree development. This Special Issue aims to provide a platform for the dissemination of the molecular research of fruit tree development. We warmly welcome the submission of your original papers and reviews based on the results from molecular viewpoints.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
