

Special Issue

Editorial Board Members' Collection Series: Autoimmune Diseases—2nd Edition

Message from the Guest Editors

This Special Issue, dedicated to autoimmunity, attempts to present a comprehensive overview of autoimmune diseases (ADs) and how the immune system self-targets in different conditions according to a balance determined by the genetic predisposition of the host, its gender, epigenetic factors, environmental circumstances, and other co-factors. Moreover, current knowledge from human and animal models is welcome regarding the pathogenic mechanisms of autoimmune diseases, clinical aspects of specific autoimmune diseases, as well as insights regarding biomarkers and specific therapies.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
