Molecular Research in Female Reproductive Disorders

Message from the Guest Editors

Molecular research has become increasingly important in the fields of obstetrics and gynecology, as it has the potential to shed light on the underlying mechanisms of various reproductive disorders and complications. The molecular bases of genetic diseases, hormonal imbalances, and infections can be better understood through molecular research. This can aid in the development of new diagnostic tools, as well as preventive and treatment strategies for a huge range of reproductive disorders, from infertility and perinatal complications to gynecological cancers. Additionally, molecular research can provide valuable insights into fetal development and pregnancy outcomes. Biomolecular experiments which aim to clarify the etiopathogenesis and outcomes of high-risk pregnancies, including those complicated by preeclampsia, pregestational and gestational diabetes, preterm delivery and recurrent fetal loss or infections are suitable for submission, as well as studies on the molecular aspects of gynecological disorders. Pure clinical or model studies will not be suitable for submission.

Guest Editors

Dr. Angelo Sirico

Institute of Gynaecology and Obstetrics, University of Campania "Luigi Vanvitelli", Caserta, Italy

Dr. Silvia Salvi

UOC di Ostetricia e Patologia Ostetrica, Dipartimento di Scienze della Salute della Donna e del Bambino e di Sanità Pubblica, Fondazione Policlinico Universitario A. Gemelli, IRCCS, Rome, Italy

Deadline for manuscript submissions

closed (30 March 2024)

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
