

## Special Issue

# Neuropeptides and Neurological Diseases

### Message from the Guest Editor

We invite investigators to submit original research articles as well as review articles contributing to better understand the following topics that include, but are not limited to:

- Pharmacology of cortistatin receptors: modeling, binding, signaling.
- Endogenous roles of cortistatin in central and peripheral nervous, immune, endocrine, gastrointestinal, respiratory and cardiovascular systems.
- New therapeutic strategies based in the use of cortistatin and analogues: bioavailability and specificity.
- Identification of cortistatin and its receptors as potential disease biomarkers.
- Ontogenetic evolution of the cortistatin–receptor system and functions of the cortistatin–receptor system in non-mammals.

---

### Guest Editor

Prof. Dr. Mario Delgado

Instituto de Parasitología y Biomedicina "Lopez-Neyra", CSIC Avda. Conocimiento S/N Parque Tecnológico Ciencias de la Salud, 18100 Armilla, Granada, Spain

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
