

## Special Issue

# New Advances in Rare Genetic Disorder

### Message from the Guest Editor

In this issue dedicated to advances in rare diseases, we would like to focus on those that have moved towards translational research. All of us who work in this field know that most rare diseases do not have an effective therapy, and in many of them, only palliative therapies can be applied once symptoms have developed. In this issue, we want to highlight the research carried out in the search for new therapeutic agents, drug replacement, identification of therapeutic targets, gene therapy, cell therapy, and even the development of new diagnostic strategies towards the development of personalized medicine. We hope that this Special Issue will be of interest to you.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
