

## Special Issue

# Skin Diseases: Molecular Targets for New Therapeutics

### Message from the Guest Editor

Skin diseases are a growing problem worldwide, not only because of their prevalence in society and the growing number of patients, but also because of the rising cost of treatment and the insufficient effectiveness of currently available therapies. Importantly, the pathogenesis and molecular basis of skin diseases are often not fully understood. Therefore, extensive studies regarding new therapeutic approaches seem to be a priority, whereas an understanding of how drugs may modify or modulate the molecular mechanisms in the skin will be helpful in this process.

The Special Issue is focused on the molecular targets for new therapeutics in skin diseases including skin cancer, autoimmune skin diseases, and inflammatory skin diseases. Studies regarding the biological and molecular mechanisms of new compounds which may be used in the future in the therapy of skin disorders as well as clinical submissions with biomolecular experiments are welcomed.

---

### Guest Editor

Dr. Katarzyna Walczak

Laboratory for Immunology of Skin Diseases, Chair and Department of Dermatology, Venerology and Paediatric Dermatology, Medical University of Lublin, Radziwillowska 11, 20080 Lublin, Poland

---

### Deadline for manuscript submissions

closed (30 September 2023)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
