# Special Issue

# Nonalcoholic Fatty Liver Disease/Metabolic Associated Fatty Liver Disease: New Insights 2.0

## Message from the Guest Editors

Nonalcoholic fatty liver disease (NAFLD) is an important health care problem worldwide. It affects 30% of adults in the general population, 70% of patients with type 2 diabetes (T2DM), and all patients with obesity. Importantly, NAFLD is now the second most frequent indication for liver transplantation in the United States. In the last several decades, it has become evident that NAFLD is not only associated with serious liver-related complications, but also with relevant metabolic, cardiovascular, and renal complications. Although the pathogenesis of NAFLD is complex, it was established that NAFLD is strongly linked to insulin resistance, abdominal obesity, and T2DM.

This Special Issue of the International Journal of Molecular Sciences will focus on recent developments in the area of NAFLD/MAFLD pathogenesis and treatment, as well as new insights into the mechanisms and therapies for NAFLD/MAFLD. It will cover a selection of recent research topics and current review articles in the field of NAFLD/MAFLD. Experimental papers, up-to-date review articles, and commentaries are all welcome.

## Guest Editors

Dr. Alessandro Mantovani

Section of Endocrinology, Diabetes and Metabolism, Department of Medicine, University of Verona, 37126 Verona, Italy

Dr. Andrea Dalbeni

Hypertension and Liver Unit, Section of General Medicine, University of Verona, Verona, Italy

## Deadline for manuscript submissions

# About the Journal

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences* (*IJMS*) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology "Jose Mataix", Biomedical Research Center, University of Granada, Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

## Author Benefits

**Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:**

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
