

Special Issue

Molecular Research on Fibrotic Interstitial Lung Diseases

Message from the Guest Editors

We are delighted to announce a call for submissions to a Special Issue of the International Journal of Molecular Sciences on the topic of Molecular Research on Fibrotic Interstitial Lung Diseases. Fibrotic disorders of the lung are a spectrum of clinical entities with different underlying etiology ranging from occupational exposures, immunological diseases, and drug exposures to idiopathic etiology. Furthermore, vigorous inflammatory stimuli due to infections (e.g., SARS-CoV, SARS-CoV-2) or acute respiratory distress syndrome could result in dysregulated lung repair and pulmonary fibrosis. Idiopathic pulmonary fibrosis (IPF) is the most common fibrosing lung disease and is associated with progressive loss of pulmonary function and high mortality. Knowledge on the molecular mechanisms underlying pulmonary fibrogenesis is essential to support the efficient translation of new targeted therapy from bench to clinic. We encourage the submission of both original research articles and reviews on all aspects of the molecular mechanisms behind the development and the progression of fibrotic lung diseases. All submitted articles will undergo peer review.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
