Updates on Erythropoietin

Message from the Guest Editor

Red blood cells carry oxygen to all organs in the body. Hypoxia and anemia cause cell damage and finally result in cell death. Erythropoietin (Epo) is produced via the activation of HIF2a and downregulation of PHD2 by hypoxia and anemia. Erythropoiesis-stimulating agent (ESA) and PHD inhibitors were used to substitute the erythropoietic effects of Epo for patients with renal anemia. Epo has many effects on cellular function other than the production of blood cells. After many large-scale studies, ESAs were found not to have renoprotective effects. However, PHD inhibitors have renoprotective effects, especially in cases of ischemic reperfusion injury. Although exogenous Epo (ESAs) does not have renoprotective effects, endogenous Epo produced by PHD inhibitors has renoprotective effects, suggesting that the HIF-PHD-Epo cascade is related to cell survival. The purpose of this Special Issue is to gather various data on the HIF-PHD-Epo cascade to discuss the role of endogenous Epo in cell survival against hypoxia.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
