Molecular Advances in Rare Inherited Neuromuscular Diseases: Therapeutic and Diagnostic

Message from the Guest Editor

Inherited neuromuscular diseases are disorders affecting the muscles, motor neurons, peripheral nerves, or the neuromuscular junction. In recent years, many advances have been achieved in the field of therapeutic interventions in rare neuromuscular diseases; however, we are still far from achieving possible therapies for many disorders, and many others are still underdiagnosed and underestimated. In this Special Issue, we will focus on new possible diagnostic tools and new therapeutic interventions based on molecular approaches, and particularly on drug-repurposing approaches, for rare inherited neuromuscular diseases for which there are still no known and approved therapeutic strategies. This Special Issue, entitled “Molecular Advances in Rare Inherited Neuromuscular Diseases: Therapeutic and Diagnostic”, thus aims to collect research papers and reviews on this topic. We invite colleagues working in this area to submit their work for publication in this Special Issue of the *International Journal of Molecular Sciences*.

Guest Editor

Dr. Diego Lopergolo

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
