

Special Issue

Applications of Green Chemistry Principles to Nanoscience and Nanotechnology

Message from the Guest Editor

The nanotechnology field is one of the most significant scientific and engineering research advances of the 21st century, and has the competence to contribute sustainable development goals since there are several emerging applications with great promise for greener chemical manufacturing. Research groups should pay attention to the use of renewable biopolymers as an alternative to conventional polymers in the future development of the nanotechnology field.

Presently, significant progress so far has been reached in preparing biocompatible and biodegradable nanomaterials or nanocomposites. Another potential example in the field to consider is an exploration of biopolymers in the synthesis of metal nanoparticles as reducing and stabilizing agents and as an alternative to hazardous reagents.

This Special Issue targets the publication of well-composed original research or critical review papers that study some aspects of 12 green chemistry principles and other papers that show the continuous efforts in the development of nanomaterials succeeding sustainable development goals.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
