Hormone Receptors: A 2023 Update

Message from the Guest Editor

Tremendous progress in the field of molecular, cellular and structural biology in association with the explosion of data from omics analyses have enabled deeper understanding of how a target cell responds to a hormonal signal. Hormones signal through binding onto their cognate membrane, cytoplasmic and/or nuclear receptors, thereby triggering a plethora of cellular responses that contribute substantially to our internal balance, or homeostasis. The molecular basis of an ever-increasing number of endocrine disorders has been attributed to defects in genes encoding hormone receptors. On the other hand, accumulating evidence suggests that genetic defects have been also identified in molecules participating in hormonal signal transduction pathways, indicating that many nosological entities might be considered as “signalopathies”. In this Special Issue, it is a great honor and pleasure to invite experts and interested scientists to contribute to an update on hormone receptor physiology and pathophysiology.

Guest Editor

Dr. Nicolas C. Nicolaides

Division of Endocrinology, Metabolism and Diabetes, First Department of Pediatrics, National and Kapodistrian University of Athens Medical School, 11527 Athens, Greece

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
