Advances in Hepatocellular Carcinoma

Message from the Guest Editor

Hepatocellular carcinoma (HCC) is the most common primary liver cancer; it frequently occurs in patients with chronic viral hepatitis, alcoholic liver disease, or non-alcoholic steatohepatitis (NASH). It is the sixth most common cancer and the fourth most common cause of cancer-related deaths in the world.

This Special Issue in the International Journal of Molecular Sciences entitled “Advancements in hepatocellular carcinoma” will pay particular attention to unexplored molecular mechanisms and signaling events in hepatocarcinogenesis, liver pathophysiology, the tumor microenvironment, and immune modulation during HCC progression and recurrence, and more importantly, novel strategies to treat or mitigate drug resistance for advanced HCC. We look forward to physicians and researchers interested in the unmet medical needs of advanced hepatocellular carcinoma sharing their exciting translational studies with broad readers and improving our knowledge towards future medical success.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
