Human Immunodeficiency Virus-1 Infection: Molecular and Cellular Immunity

Message from the Guest Editor

Human immunodeficiency virus (HIV) infection currently affects more than 38 million people worldwide. The introduction of antiretroviral therapies (ART) led to a suppression of HIV replication and, therefore, a drastic reduction in mortality and an important improvement in the quality of life of people living with HIV (PLWH). However, ART fails to eradicate HIV, and the virus remains latent in anatomical and cellular reservoirs. The aim of this Special Issue is to collect studies that contribute to a better understanding of the molecular and cellular immunological processes involved in chronic HIV-1 infection. The suggested topics of interest are: 1) humoral and cellular immune responses in chronic HIV-1 infection; 2) immunological features of HIV controllers; 3) HIV anatomical and cellular reservoirs; and 4) cellular and molecular immune mechanisms behind non-AIDS events.

This Special Issue is supervised by and assisted by our Topical Advisory Panel Member Dr. Sara Bachiller (University of Seville).

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
