

Special Issue

Interactions between Plants and Nematodes

Message from the Guest Editor

Plant nematodes are among the most economically devastating plant pathogens and cause huge annual yield losses globally. Nematodes establish parasitism by secreting a large number of effectors that help them invade roots, suppress plant defense and induce feeding sites. Research efforts have focused on the molecular mechanisms underlying the interactions between nematodes and host plants. This Special Issue of *IJMS* welcomes manuscript submissions that address plant–nematode interactions, plant resistance genes against nematodes, as well as interaction or resistance mechanisms.

Guest Editor

Dr. Qian Liu
College of Plant Protection, China Agricultural University, Beijing, China

Deadline for manuscript submissions

closed (20 November 2025)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
